About me

I am a self-taught web developer. My curiosity started in university when I was doing a web standards module as part of my graphic design course. This was when I decided to learn more about web development, and in particular front-end development.

My first programming language was JavaScript and I have been learning about object-oriented programming and how it's so powerful. In addition, I have adopted problem solving and test driven development techniques in my work. Furthermore, I have exposed myself to other languages, libraries and frameworks such as Ruby, jQuery and Bootstrap.

I am currently looking to join a work environment where I share my knowledge and skills to build projects and solve problems with a passionate and hardworking team. My hunger is limitless to learn about new technologies & techniques and to constantly improve.

Work Experience

Graphic Designer: London Graphics July – August 2017

- Customised resumes for clients to be part of their booklet presentation.
- Created a booklet, which contains intro, brand identity and exterior design.
- Designed a high-resolution poster for a public event.

Teaching Assistant Volunteer: King Fahad Academy April – May 2017

- Clarified and guided the students in their assignments.
- Helped teachers and covered for absent assistants.
- Organised the classroom and prepared the materials for next period.

Office Junior: Aran World Ltd May – November 2015

- Taught and supervised a trainee.
- Researched and recommended required products with low prices.
- Diagnosed a technical problem on my supervisor's phone and solved it.

Education

- 2016 – Present: Treehouse – Front-End Development | Web Design
- 2016 – Present: FreeCodeCamp – Front-End Development

My latest projects as part of this curriculum are [one page portfolio site](#) and [random quote machine](#). Currently, I am working on my personal portfolio.

- 2012 – 2014: University of Greenwich – BA Graphic and Digital Design

Events/Workshops: A regular student with [codebar](#) where I learn and build my skills.
